PROJECT

DevsPlatform

September 2024 - Oct 2024

Built a web **development_learning** and **showcase** platform using the MERN stack. Users can **participate** in frontend challenges, **submit** creative solutions, and have the **best submissions featured** as **reusable components** for others. The platform provides a structured template for submissions and fosters a community of learners and developers by offering free resources and an engaging **environment for skill enhancement**.

E-Commerce Platform

July 2024 - August 2024

Developed a full-stack e-commerce web application using the MERN stack, enabling users to browse, search, and purchase products. The platform includes user **authentication**, dynamic **product filtering**, a shopping **cart**, and an integrated **payment gateway** for secure transactions.

EDUCATION

LD College of Engineering

Information Technology - 8.41

june 2022 - june 2026

SKILLS

- **Languages:** JavaScript, Java
- **Frontend:** HTML, CSS, React.js
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Tools:** Git, GitHub
- **Other:** Competitive programming, Responsive design

Archivement

- Solved **326 coding problems** on [LeetCode](#) and **185 problems** on [GeekforGeeks](#)
