PROJECT

DevsPlatform ↗   September 2024 - Oct 2024

Built a web **development learning** and **showcase** platform using the MERN stack. Users can **participate** in frontend challenges, **submit** creative solutions, and have the **best submissions featured** as **reusable components** for others. The platform provides a structured template for submissions and fosters a community of learners and developers by offering free resources and an engaging **environment for skill enhancement.**

Spliter ↗   Des 2024 - Feb 2025

Spliter is an advanced **real-time bill-splitting and payment platform** designed for seamless group expense management. Whether you're sharing rent, splitting restaurant bills, or managing travel expenses, our app ensures **instant updates and direct payments**, eliminating manual calculations and delayed settlements.

E-Commerce Platform ↗   July 2024 - August 2024

Developed a full-stack e-commerce web application using the **MERN** stack, enabling users to **browse**, **search**, and **purchase** products. The platform includes user **authentication**, dynamic product **filtering**, a shopping **cart**, and an integrated **payment gateway** for secure transactions.

Productivity Extension ↗   Jan 2025 - Feb 2025

A Chrome extension designed to help users **monitor their time spent** on various websites. It **tracks productive and distracting activities**, allows users to **block distracting sites**, and provides insightful reports , With an intuitive interface . The extension enhances focus and efficiency by promoting mindful browsing.

EDUCATION

LD College of Engineering

Information Technology - 8.41   june 2022 - june 2026

SKILLS

- **Languages**: JavaScript, Java
- **Frontend**: HTML, CSS, React.js , Tailwind css
- **Backend**: Node.js, Express.js
- **Database**: MongoDB
- **Tools**: Git, GitHub
- **Other**: Competitive programming, Responsive design

CERTIFICATE

CODTECH IT SOLUTIONS Internship

During my internship at **CODTECH IT SOLUTIONS**, I worked on **MERN Stack Web Development**, gaining hands-on experience in **building and deploying full-stack applications**. Over the **two-month program** (December 25, 2024 – February 25, 2025)

- **Developed dynamic web applications** using MongoDB, Express.js, React.js, and Node.js.
- **Worked on projects**, implementing **authentication, database management, and API integration**.

Archivement

- Solved **370+ coding problems** on LeetCode with rating of 1500 and **250+ problems** on GeekforGeeks
